

FRONT

Thank you for purchasing the new version of our flagship pedal, the Wave Cannon® MKII Superdistorter! This Cannon comes pre-loaded with balls! We've made this pedal to help you get even more terrific sounding distorted textures, from lighter drive and cranked, dirty amp crunch tones to the sound of a furry Godzilla devouring a junkyard full of broken a/c window units.

Proudly made in the USA at our small batch distortery™ in Columbia, S.C., this pedal is more than capable of overwhelming your amp with "amber waves of gain" to give you plenty of power, control, and fun - and that's even before we get to the Havoc switch.

SAMPLE SETTINGS - FLAVOR TO TASTE

musical/personal agenda				
"I don't really like pedals except that little green one from way back. Do they still make those?"				
"I'm willing to have a ballad on our album if it helps sales."				
"We love plagues, sorcery, and ancient empires, so yes, we <u>do</u> write love songs."				
"Our galactic emperor would like to order your special ömelet. With extra ümläüts."				

IMPORTANT - if you use a power supply, use only a 9V DC center negative tip power supply, BOSS PSA or equivalent industry standard units. Also, our warranty only covers component failures or manufacturing defects - it does not cover misuse or abuse of the product, modifications or unofficial work. Thanks again for supporting our work!
