

SSSWWOOOOOOAAAASHH! The AIM establishes intensity and frequency emphasis. The SPEED controls the LFO rate, from ketchup bottle slow to caffeinated jitters. FEEDBACK recycles output from a later stage back to an earlier one, for a more vocal effect. MIX goes all the way from fully dry, to different phasing depths, all the way to a 100% wet vibrato.

The WAVE selector allows you to make the 100% analog LFO triangular or square. The MOD, courtesy of DIY legend Mark Hammer, is super cool - it changes the filter notches in the stages from symmetrical to something closer to a 60s vibe pedal. HAVOC is all gas, no brakes! And for our final surprise, you may hold down our BYPASS control for momentary activation (or bypass) of the effect!

(front)

ARIGATO neither seeks to recapture the sounds of the past, nor to be state of the art. It is a snapshot of a future we were promised as children. While capable of the airy psychedelia of classic units, this one is meant to rumble, wobble, shake, rattle, and roar. It is also capable of going fully wet for interesting vibrato sounds, max out feedback for auto-wah sweeps, and a wide range of responsive shades throughout each control as they interact with the others.

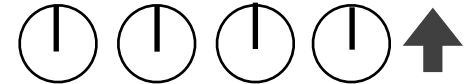

We're pretty excited about this release; the first pedal Philippe ever owned was a phaser, and releasing this feels like coming home. Your pedal was dreamed, designed and created at our small batch distortery™ in Columbia, S.C. Thank you for supporting our work, and putting it to use for yours.

### SAMPLE SETTINGS - FLAVOR TO TASTE

musical/personal agenda

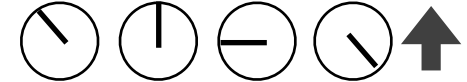

"True north - they've told me that if everything points straight up, it will all be OK."

"With this device, both your lungs and your riffs can breathe this planet's heavier air."

"The sound from the cassette would gently wobble, revealing some defect in the mechanism."

"Behind the waterfall was a cave, where the cyborg fugitives were holding an elegant dinner party."

**IMPORTANT:** Use only a 9V DC center negative tip power supply, BOSS PSA or equivalent industry standard units. Do NOT try this at higher voltage. Our warranty only covers component failures or manufacturing defects - it does not cover misuse or abuse of the product, modifications or unofficial repair work.
